

Veritas Government Licensing Program Data Sheet

Streamlined access to the industry's leading information management solutions for academic organizations

Overview

The Veritas Government Licensing Program (GLP) is designed to provide government organization a simple purchasing process to access our entire portfolio of Veritas software, appliances, maintenance/support and services (Offerings).

GLP purchases issue with standard certificate-based terms and conditions and can be made through any Certified Veritas Partner.

Organizations will need to submit proof of eligibility with their first order. Eligible organizations include:

- Government Agencies
- Government Funded R&D Centers
- Prime Government Contractors
- US Tribal Governments
- United Nations and their agencies
- State and Local Municipalities
- State, County or Municipal Hospitals
- Non- Profit - 501c3 Organizations

A complete list of eligibility requirements can be found at www.veritas.com/licensing/government

Once eligibility has been established, customers can simply request a quote from their Veritas Partner and submit their PO. Customers will receive a certificate directly from Veritas that confirms their order and indicates terms and conditions for the items purchased.

All customers will be assigned a unique identifier at the time of initial purchase. This identifier will be used to track additional purchases and can be used to effectively view, track and manage purchased Offerings and maintenance/support renewals.

Key Features and Benefits

- No minimum purchase
- Provides built in discounts specifically for government and non-profit organization
- License deployment in country of purchase*
- Easy to buy via standard certificate-based terms and conditions
